General Information:

Finance Publications receives in excess of 50,000 hits to its website each month from professional financial advisors around the world.

We have found that in the ever changing world of finance the internet has become the new medium for communications and the transfer of this information quickly. Moreover, reliable sources of data and a good library of solid information are not always easy to find, so why not add us to your favourites for one of the first places to look?

Articles:

Articles are included in Global Assets Online at a cost of £500 each. For this we included a live link to the client directly via email at the foot of their article - additionally we also provide a live link to the client's website. We have found that this "direct" reply approach is easier for all parties wishing to communicate.

Additionally, all contributors to Global Assets are given a free subscription for 12 months which allows them access to all the information available on the website.

PDF files and email database mailings:

Posting new products and corporate profiles as a pdf file within Global Assets Online are available upon request. We can assist you with your companies Marketing & PR Planning through emailshots anywhere in the world from our database of accountants, lawyers, fund managers, trust & company administrators, IFA's etc throughout the world of finance. This can be anything from corporate newsletters to the promotion of financial seminars.

Banner Adverts: *(see website advertising)*

There are two types of Banner adverts - PrimaryPlus & Primary Banners. The PrimaryPlus banner advert is on the header of every page. It rotates and there are only three of these available.

Primary Banners are on every page also but they are not in the header bar; there are a maximum of 30 available.

Finally, banner advertisements need not be simply a flat display advertisement on the internet to be tasteful - ask us or your advertising agents about gif advertising files
